NATIONAL DAY PARADE SILVER AWARD

BIOGRAPHY

Veronica Loh is a co-founder of Praxora Lab and Managing Director and Chief Sustainability Officer of Orion Five Engineering, a Singapore engineering practice built around systems integration. She brings twenty-six years managing business operations in Singapore and across the region, spanning logistics, food technology research and development, mechanisation of manufacturing processes, and the digitalisation of manufacturing and logistics operations.

Over the past decade she has led several multidisciplinary, integrated projects for both government bodies and private sector organisations, helping them cut cost and meet strategic objectives through customised IoT, ERP and robotics work delivered by a multidisciplinary engineering team.

She has taken part in two National Day Parades as part of the Small and Medium Enterprise contingent, and holds two NDP Silver Awards for her contribution.

AREAS OF EXPERTISE

Multidisciplinary engineering delivery

Leading integrated IoT, ERP and robotics projects for government and private sector clients, coordinating across disciplines to cut cost and meet strategic objectives.

Manufacturing and logistics digitalisation

Two decades spanning mechanisation and digitalisation of manufacturing and logistics operations, and food technology research and development.

Sustainability and compliance systems

ISO 14064 greenhouse gas verification, food safety management systems (FSSC 22000 / ISO 22000:2018) and quality management auditing.

SELECTED CLIENT ENGAGEMENTS

2026	Machine-learning quality control for pill packs Pharmaceutical packaging client
2025	RFID asset and inventory management, with self-service kiosk Government Agency
2025 to 2026	AI diagnostic and e-commerce platform for scalp longevity HAAR
2024	Robotic carton removal line for egg distribution Raymang Eggs Pte Ltd
2021	Contactless high-speed temperature scanner AETOS
